METERING SMART PLUG

nodon

Features

The EnOcean Metering Smart Plug connects any device plugged into it and measures its energy consumption (compatible home automation gateway needed). It is then remotely controllable with a wireless battery-free controller. Lights, electric heaters can be automatically controlled.

HIGH POWER CAPACITY
Up to 16A, compatible with all household appliances

METERING FEATURE
Metering of instant power and cumulated energy, to make energy savings

SIGNAL REPEATER
The Smart Plug repeats messages from all other EnOcean devices

USER-FRIENDLINESS
Plug it in head up or head down for user-friendliness easy installation

SMART ACTUATOR
The Smart Plug works directly with EnOcean devices and can be integrated into a home automation gateway ecosystem

Technical specifications

Power: 230V AC 50Hz (EU)

Consumption: < 1W

Max switching capacity:
3.000W (Continuous)
3.680W (Temporary) on resistive load

Metering of Instant power (W) and cumulated Energy (Wh)

Radio frequency range: 868.0 to 868.6 MHz

Range: up to 30m indoors

Pairing: up to 22 controllers

EEP (EnOcean Profile): D2-01-0B

enocean® quickmove List of compatible home automation gateways available on www.nodon.fr

Comfort

Central management of auxiliary lights with a battery-free remote control

Automatically turn appliances OFF when the room is empty

Serenity
