

## Features

The EnOcean Wall Switch is wireless and battery free, it can be easily installed (with screws or adhesives) for the user to remotely control lighting, roller shutters, heating and connected devices. It can also be used as a scenario launcher.

### NO BATTERY: NO MAINTENANCE

The Wall Switch works thanks to the mechanical energy generated by the push on one of the buttons

### NO WIRE: EASY INSTALLATION, NO DIY WORK

The Wall Switch can be installed on all area types thanks to its adhesive strips or screws (not included)

### SMART ACTUATOR

The Wall Switch works directly with EnOcean devices and can act as a scenario launcher, once integrated into a home automation gateway ecosystem

## Technical specifications

**Power source:** Magneto-resistive (no battery)

**4 buttons - 2 channels or 1 button - 1 channel** (both version included in packaging)

**Wall mounting** using adhesive bounding (included) or screws (not included)

**Radio frequency range:** 868.0 to 868.6 MHz or 905 to 915 MHz (according to the reference)

**Range:** up to 30m indoors

**EEP (EnOcean Profile):** F6-02-01

List of compatible home automation gateways available on [www.nodon.fr](http://www.nodon.fr)

## Renovation

Add a new wall switch to control the roller shutters

New hassle-free back-and-forth: no wiring, quick and flexible installation of a new controller

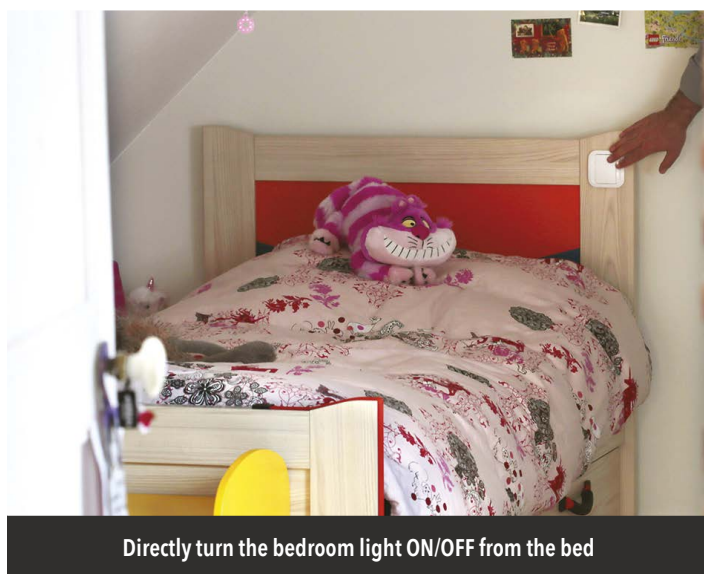

Control all the office lighting from a single wall switch

## Comfort

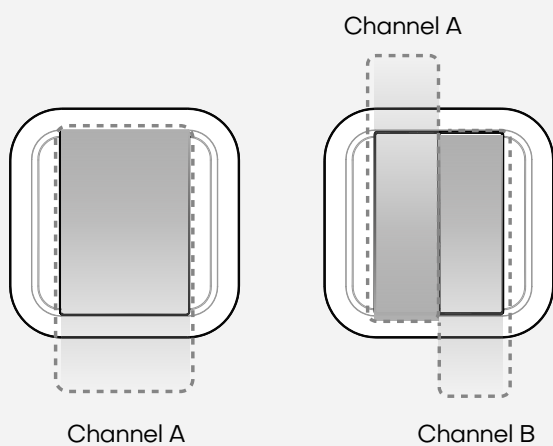

Launch the "leaving home" scenario: the lights are turned OFF and roller shutters closed\*

Directly turn the bedroom light ON/OFF from the bed

\*Home automation gateway needed

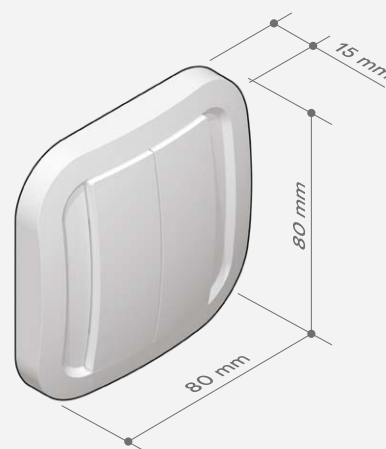

## Use

The Wall Switch has two button types, working by channels.

The button pushed during pairing will control your EnOcean actuator.
